In regard to my recent visit to your company at which time I agreed to obtain information regarding plastisol, I have discovered that there are other materials which would be more satisfactory to us. After looking over the possibilities we have come up with some samples which I have enclosed, any of which would be acceptable. Prices can probably be obtained from the U. S. Rubber Company. I would like to have these samples returned when you're finished with them.

It might be desirable to obtain two sample bag sizes, one 36 inches long, and the other 30 inches.

If any questions arise from this latest development I will be more than happy to discuss them with you at your convenience.

Respectfully,

Encl.
